DHS/SSIS Project

Create an SSIS Client Install CD-Rom

Reference Document #191

February 4, 2004

How to Create an SSIS Client Install CD-R

The SSIS server has a CD burner and Roxio CD burner software.

The media used are called CD-R disks. CD-R stands for
**C**ompact **D**isk-**R**ecordable.

You may buy them in bulk, shrink wrapped in a stack of 100, or in packages
of 20 or less with each CD-R in it's own plastic case.

CD-R's can be labeled using a marker like a Sharpie.

Create an SSIS Client Install CD-R

1. Load a blank CD-R into the CD burner on the SSIS server.

2.

Double-click the **SSIS Client CD-R** icon.

3.

Click the **Create CD** button.

4.

Click the **OK** button.

Note: *Set the number of copies if you want more than one SSIS Client Install CD-R.*

**5.** The burn process will take less than 10 minutes. When complete, remove the CD-R, label it with a Sharpie or similar marker, noting the SSIS Client version number.

6. Load the SSIS Client Install CD-R into a workstations CD-ROM drive.. There is an autorun file on the SSIS Client Install CD-R. The SSIS Client installer should automatically launch within one minute.

Note: If the CD-R does not automatically launch the SSIS client installer:
1. Open Explorer.
2. Naviagate to the **disk 1** folder.
3. Double-click the **SETUP.EXE** file to launch the SSIS Client installer.

If you have questions or problems with the process, please call the
 SSIS Help Desk at (651) 772-3777 for assistance.
